TAX WARNING!

Regardless of your tax bracket, you may want to consider increasing your tax withholding or increasing your estimated tax payments in order to avoid “tax due” surprises next year! It’s apparent that more and more taxpayers will start to notice increased taxes and fewer eligible deductions on your 2013 tax return. To plan ahead, talk to your employer about an increase in your withholding and for those of you who are self-employed or retired, you may consider upping your estimated quarterly tax payments. Give us a call if you want more help, but consider yourself warned that whatever you have paid in or withheld in the past may not be enough moving forward. If you don’t want to pay more in throughout the year, at least think about it again in the fall, and give yourself time to prepare before year-end.
